SKILLS

- **Languages**
JavaScript, TypeScript, Python, C, HTML, Markdown, CSS
- **Libraries/Frameworks**
React.js, Next.js, Astro, Remix, Svelte, SvelteKit, Tanstack Query, Redux, Zustand, Zod, React Hook Form, React Router, Jest, React Testing Library, Tailwind, Material UI, SASS, Bootstrap, Chakra UI, Framer Motion
- **Others**
Firebase, Git, Linux

EDUCATION

Harvard University

October - December 2022

- Completed CS50: Introduction to Computer Science by Professor David J. Malan
- Completed CS50W: Web Programming with Python and JavaScript by Brain Yu

FreeCodeCamp

September 2022 - September 2023

- Responsive Web Design Certification (October 2022)
- JavaScript Algorithms and Data Structures Certification (April 2023)
- Front End Development Libraries Certification (September 2023)

The Odin Project

November 2022 - Present

- Full Stack JavaScript

Islamic University of Bangladesh

November 2021 - Present

- Bachelor's in Al-Hadith and Islamic Studies (2025 expected)

LANGUAGES

English (Fluent)

Bengali (Native)

WORK EXPERIENCE

Front-End Engineer

2023 - present

ImernTech

- Consistently outperform all other team members by contributing at least 37% more lines of code and 44% more commits on every project based on GitHub insights.
- Led a team of 3 front-end developers and shipped a complex social-media-like project. One of my major roles in this project, which received significant appreciation, was implementing Zod with React Hook Form for schema-based strict form validation across five extremely complex forms, totaling over 60 fields. I also incorporated user-friendly custom error messages for each field to guide users on the expected input.
- Collaborated with two other developers to build and deliver a highly interactive large e-commerce website using Next.js 13.4 and TypeScript within a 21-day timeframe.
- Swiftly respond to the instructions, questions, and issues addressed by the project manager.
- Promote effective communication and collaboration among team members to foster teamwork and maintain positive working relationships.

Open Source Contribution

2023 - present

Official Bengali Translation of the React.js Documentation

- Actively contributing to the translation of the official React.js documentation (<https://bn-react-dev.vercel.app>), maintained by the core React team.
- Passionate about React and its functionality, I am dedicated to making React accessible for Bengali speakers from the official source.

PROJECTS

TikTokFind

Source Code (Private)

[Live](#)

Single-vendor E-commerce Website

- User and admin authentication.
- Products can be added, updated, and deleted with ease by admin.
- Tech stack: Next.js 13, TypeScript, Tailwind, Express.js, MongoDB.

Affling

Source Code (Private)

[Live](#)

Social Network for Affiliate Enthusiasts

- User-friendly admin panel.
- Complex registration forms for various types of affiliate companies with tons of fields.
- Tech stack: Next.js 13, TypeScript, Tailwind, Express.js, MongoDB.
- The project was delivered incompletely due to the client not being able to pay full payment.

Portfolio
